

INTEGRATION OF PAYSITE CASH STATISTICS IN AN EXTERNAL PLATFORM

12/12/2007 VERSION

The objective of this document is to present the possibilities of Paysite Cash statistics' integration in an external platform.

1) Merchants' Statistics Integration	2
2) Affiliates' Statistics Integration.....	2
3) Errors Codes.....	2
4) Advice on Integration	2

1) Merchants' Statistics Integration

URL: <https://billing.paysite-cash.biz/stats/>

API1: webmasters.php

API2: webmasters_quick.php

API3: webmasters_month.php

Parameters to send by GET:

User name: user name

Password: md5 of the password

Month: desired month (XX, only API 3)

Year: desired year (YYYY, only API 3)

2) Affiliates' Statistics Integration

URL: <https://billing.paysite-cash.biz/stats/>

API1: affiliates.php

API2: affiliatess_quick.php

API3: affililates_month.php

Parameters to send by GET:

User name: user name

Password: md5 of the password

Month: desired month (XX, only API 3)

Year: desired year (YYYY, only API 3)

3) Errors Codes

The APIs can return the following errors:

- too many login attempts: more than 3 sterile connection attempts in the last 5 minutes
- auth error: wrong combination of user name and password
- system error: internal error
- wrong year value: the year is not in the good format
- wrong month value: the month is not in the good format

4) Advice on Integration

You have to avoid too many queries because the system is protected against flooding.
